PennHIP Report

Referring Veterinarian: Dr Ashley French

Clinic Name: Weathered Rock Veterinary
Clinic

Email: weatheredrockvet@gmail.com

Clinic Address: 224 Weathered Rock Rd.
Jefferson City, MO 65101

Phone: (573) 634-2223

Fax: (573) 634-6010

Patient Information

Client: Gramlich, Eric

Tattoo Num:

Patient Name: Oak View Vixen

Patient ID: 30308

Reg. Name: Oak View Vixen

Registration Num: WS64495901

PennHIP Num: 153869

Microchip Num: 956000012520247

Species: Canine

Breed: SOUTH AFRICAN BOERBOEL MASTIFF

Date of Birth: 01 Apr 2019

Age: 23 months

Sex: Female

Weight: 115 lbs/52.2 kgs

Date of Study: 10 Mar 2021

Date Submitted: 10 Mar 2021

Date of Report: 12 Mar 2021

Findings

Distraction Index (DI): Right DI = 0.39, Left DI = 0.50.

Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**

Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.50.

OA Risk Category: The DI is between 0.50 and 0.69. This patient is at moderate risk for hip OA.

Distraction Index Chart:

SOUTH AFRICAN BOERBOEL MASTIFF

BREED STATISTICS: This interpretation is based on a cross-section of 1629 canine patients of the SOUTH AFRICAN BOERBOEL MASTIFF breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.30 - 0.75) for the breed. The breed average DI is 0.51 (solid square). The patient DI is the solid circle (0.50).

SUMMARY: The degree of laxity (DI = 0.50) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a moderate risk to develop hip OA. **No radiographic evidence of OA for either hip.**
